

Data technologies & data demographics survey

EDAOU Oumaima

Nov 2022

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization - Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- the programming languages and databases currently in trend
- Platforms and Web Frames currently in trend
- the programming languages and databases desired for the next year
- Platforms and Web Frames desired for the next year
- Demographics information about Respondent

INTRODUCTION

- Analyzing the trends in technologies :
 - Identifying technical skills currently in trend
 - Identifying technical skills required for future
 - Finding the most database skills in demand
 - Identifying information technology needs by geography
- In short, the goal is to identify current and future needs for technical skills to help the company make more informed decisions about which skills to recruit in the future.

METHODOLOGY

- First, a subset of the Stack Overflow dataset was used, the data was wrangled to remove duplicates, add missing values, and standardize the data.
- Second, the data were investigated to determine the distribution of the data, the presence of outliers, and the correlation between several variables.
- The data were also used to visualize the distribution, the relationship between two characteristics, the composition and for data comparison.
- Finally, databases that are modified from the StackOverflow dataset are used for visualization with Cognos Dashboard Embedded and analysis

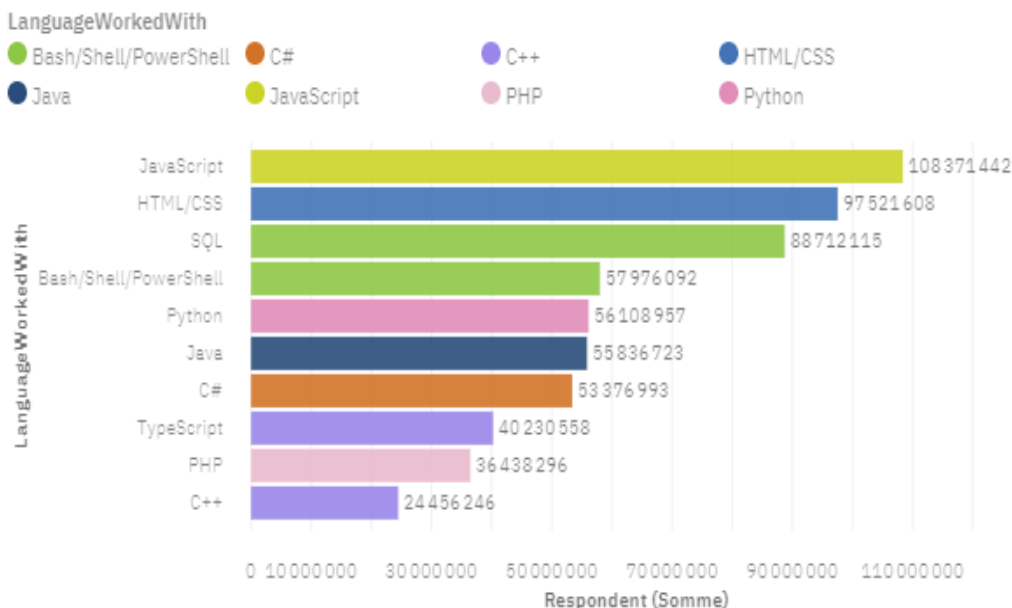

RESULTS

- Visualization – Charts
- Dashboard

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 10 Languages Worked With

Next Year

Top 10 Language Desire Next Year

PROGRAMMING LANGUAGE TRENDS – FINDINGS & IMPLICATIONS

Findings

- The top 5 of finding this year are JavaScript, HTML/CSS, SQL, bash/shell/ powershell and python.
- Typescript and Python become popular next year
- bash/shell/PowerShell lose their ranking next year from 4th to 5th
- JavaScript remains the first

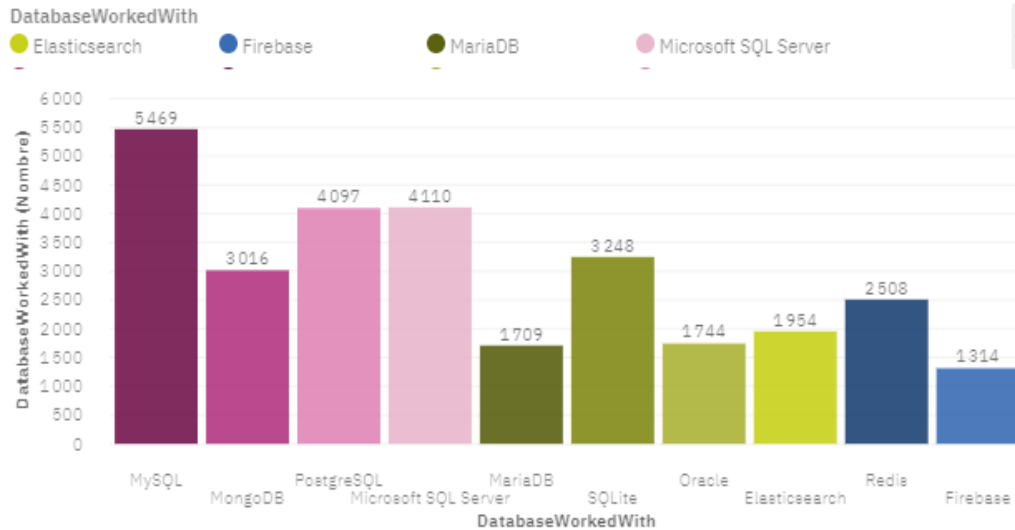

Implications

- JavaScript, HTML/CSS and SQL are still skills to look for in candidate skills
- they will become skills for which to recruit a candidate
- JavaScript is a programming language essential in technical skills

DATABASE TRENDS

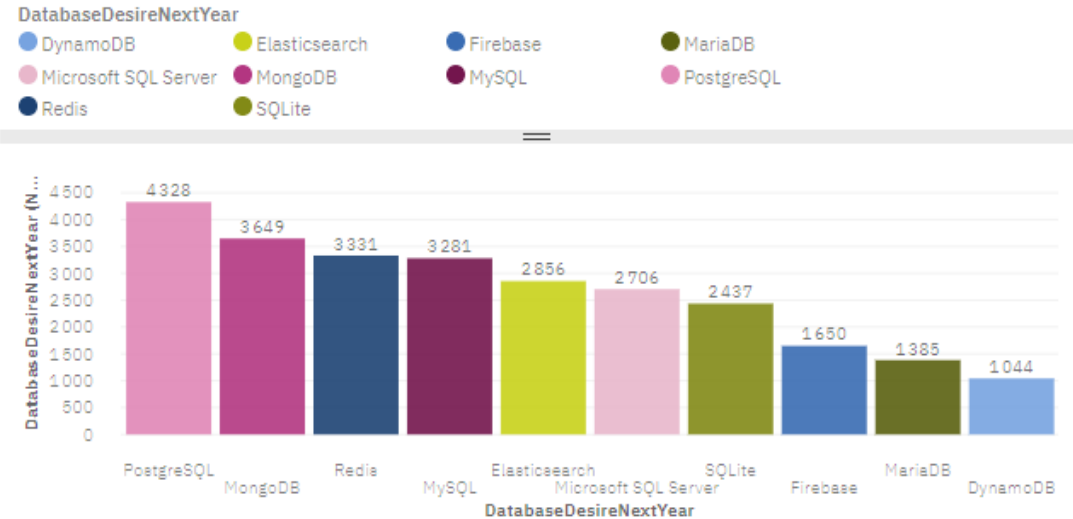

Current Year

Top 10 Database Worked With

Next Year

Top 10 Database Desire Next Year

DATABASE TRENDS – FINDINGS & IMPLICATIONS

Findings

- MySQL, MongoDB, PostgreSQL, Microsoft SQL Server and MariaDB are the most 5 popular
- Redis and Elasticsearch become more popular next year as well as PostgreSQL that is in the first rank
- MySQL lose IT ranking next year from 1th to 4th

Implications

- MongoDB is still a skill to look for in candidate skills
- recruit more candidates qualified in PostgreSQL and Redis
- recruit less candidates skilled in MySQL

DASHBOARD

DISCUSSION

Findings & Implications

OVERALL FINDINGS & IMPLICATIONS

Findings

- Programming Languages like python and JavaScript are gaining more interest in the future
- MongoDB is essential now and in the future
- Microsoft Azure and Windows are dropping significantly.
- For web frame : React.js is growing

Implications

- Recruit more candidates skilled in python and JavaScript.
- Recruit more candidates skilled in Vue.js and React.js.
- Recruit less candidates skilled in Microsoft Azure and Windows.

CONCLUSION

- Ensure a budget for hiring based on the skills needed now and in the future.
- The company must be flexible and adapt the skills it covers by launching training from time to time
- Technology needs to be extended around the world surface and women need to be encouraged every were, programs need to be launched to address these issues
